🔥 PASSIVE FIRE PROTECTION

🔥 FIRE WALLS

Daracore are Builders Work In Connection (BWIC) specialists, supporting our clients throughout the UK and Ireland since 1993. Daracore are leaders Passive Fire Protection Specialising in:

- 🔥 Passive Fire Protection
- 🔥 Fire Doors
- 🔥 Fire Walls
- 🔥 Fire Remedial Works
- 🔥 Fire Surveys

🔥 FIRE STOPPING

🔥 FIRE DOORS

Complete surveys before install

Throughout the project, we use our specialist in-house technology to provide a complete audit. Once the assessment is completed and recommendations are implemented this handheld technology produces reports instantly

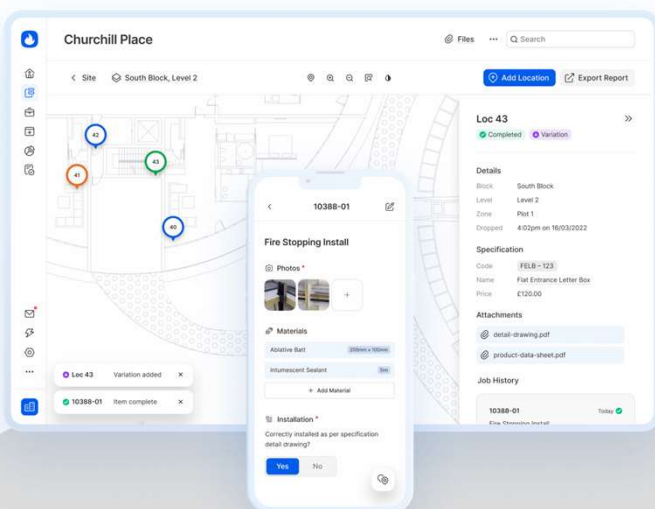

This provides an in-depth report to the costing to the works that are required with a price to complete.

Manufactured for your installation

We have our own bespoke joinery to produce the FD30 or FD60 doors you require with option available to your taste.

With our professional service we also offer full certification on completion of off fire door and passive fire protection in which we can provide our own engineer to assess that we have installed to DS 8214 & BS999 Standards

Throughout the project, we use our specialist in-house technology to provide a complete audit. Once the assessment is completed and recommendations are implemented, a full fire certificate is provided to the client to ensure your building follows all Irish and European fire safety standards.

🔥 FIRE REMEDIAL WORKS

🔥 FIRE SURVEYS

Passive Fire Protection: Dedicated to protecting lives

Our Survey teams have in depth knowledge on how to review, *upgrade, improve and install* passive fire protection to ensure fire resistance in your property is met

PFP is a complex process and all our staff have been trained to the latest methods of installs in accordance to manufacturers specifications on multiple products and situations they can be installed.

We offer drawings from our suppliers if required prior to install along with benchmark tests.

We also offer acoustic sealing.

Maintenance of Fire Doors: Ensure compliance with service contracts for ongoing regulation.

Why replace fire doors when we can maintain and repair your existing ones? This saves money and helps meet social responsibilities.

We have global assessments for door blanks. We issue certification in accordance with manufactures supply and install guidelines, ensuring compliance and saving time. Our mobile workshops are fully equipped for certified upgrades and maintenance on-site. We offer three levels of support and are open to discussing your specific requirements. Contact us to learn more about our repair and maintenance scheme

Why Choose Daracore?

- ✦ Our team have been trained and are tested on regular occasions on the products they install in numerous scenarios
- ✦ We always work collaboratively with our clients to provide integrated solutions, and to deliver on all aspects of design for complete fire-safety in a property or facility of any size.
- ✦ Our mobile teams allow us to do onsite repairs and maintenance on the spot to fire doors or replacement works if required
- ✦ Our doors are all manufactured and assembled within testing guidelines before been installed in your property which they will receive full certification.

Who backs us? Our Conformity & Compliance
